Veil® wall-hung toilet with  
Reveal® seat (K-6299-0)  
Dual-flush actuator (K-75890-7)

## Space-Saving Clean KOHLER® residential wall-hung toilets

### Space-saving

With a concealed tank, minimal footprint and installation flexibility, a wall-hung toilet can save up to 12 inches of space over our longest floor-mount models

### Easy to clean

A wall-hung toilet makes it simple to clean beneath the bowl

### Concealed design

The in-wall tank and carrier system is completely concealed for a clean, seamless look

### Water-saving flush

The dual-flush actuator lets you choose between a 0.8-gallon flush for light waste and a 1.6-gallon flush for bulk waste—saving water without sacrificing performance

### Custom height

The durable steel frame brackets are installed behind the wall and provide unparalleled installation flexibility—allowing the bowl to be set anywhere from 15¾ to 28½ inches from the floor to accommodate a range of statures

### Low-hassle maintenance

The flush actuator plate can be removed for access to the inner tank components

WaterSense®-labeled toilets use at least 20% less water than standard 1.6-gallon toilets while still meeting strict flushing performance guidelines.

Residential wall-hung toilets are WaterSense and ASME/CSA compliant.
